EER Exercise 1

Employee Types

A company stores information about all **Employees**. Each employee has an EmployeeID, Name, and HireDate. Employees are classified as either **Full-Time Employee** or **Part-Time Employee**. Full-time employees have an AnnualSalary, while part-time employees have an HourlyRate. Every employee must belong to exactly one of the two employee types.

Task: Draw an EERD showing the superclass, subclasses, inherited attributes, and specialization constraints.

Answer:

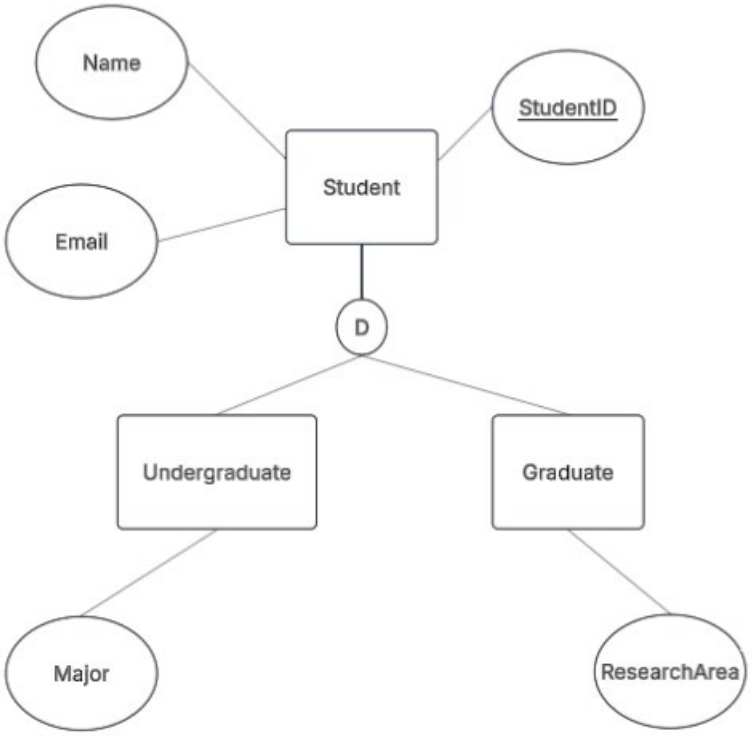

EER Exercise 2

University Students

A university stores information about **Students**. Each student has a StudentID, Name, and Email. Some students are **Undergraduate Students**, some are **Graduate Students**, and some are enrolled in non-degree programs and belong to neither subclass. Undergraduate students have a Major, while graduate students have a ResearchArea. A student cannot be both an undergraduate and graduate student at the same time.

Answer:

EER Exercise 3

University Personnel

A university stores information about **University Personnel**. Each person has a PersonnelID, Name, and Email. A person may be a **Faculty Member**, a **Staff Member**, or both. Faculty members have an AcademicRank, while staff members have a JobTitle. Some university personnel may belong to neither category.

Answer:
