```sql
CREATE TABLE Student (
  ID INT PRIMARY KEY,
  Name VARCHAR(100),
  Major VARCHAR(50),
  GPA DECIMAL(2,1)
);

CREATE TABLE Faculty (
  ID INT PRIMARY KEY,
  Name VARCHAR(100),
  Room CHAR(10)
  );

CREATE TABLE Course (
  ID CHAR(7) PRIMARY KEY,
  Name VARCHAR(100),
  Credits INT,
  Department VARCHAR(20),
  FacultyID INT,
  FOREIGN KEY(FacultyID)
    REFERENCES Faculty(ID)
);

CREATE TABLE Enrollment (
  StudentID INT,
  CourseID CHAR(7),
  Semester VARCHAR(50),
  PRIMARY KEY (StudentID, CourseID,
    Semester),
  Grade CHAR(1),
  FOREIGN KEY(StudentID)
    REFERENCES Student(ID),
  FOREIGN KEY(CourseID)
    REFERENCES Course(ID)
);
```

Question 1. True or False (12 points)

Circle **T (True)** or **F (False)** to indicate whether each statement is correct. Assume foreign key constraints are enforced.

Table Creation

a) T F The Faculty table must be created before the Course table.

b) T F The Student table must be created before the Faculty table.

c) T F The Enrollment table must be created after both the Student and Course tables.

d) T F The Enrollment table can be created before the Student table, provided no records have been inserted yet.

Table Deletion (DROP TABLE)

e) T F The Enrollment table must be dropped before the Course table.

f) T F The Student table can be dropped before the Enrollment table if the Enrollment table contains no records.

g) T F The Course table must be dropped before the Faculty table.

h) T F The Faculty table can be dropped before the Course table if all the FacultyID values in the Course table are NULL.

Record Insertion (INSERT INTO)

i) T F A Faculty record must exist before inserting a Course record that references that faculty member.

j) T F A Student record must exist before a Faculty record can be inserted.

k) T F Before inserting an Enrollment record, the corresponding Student and Course records must already exist.

l) T F A Course record cannot be inserted unless its FacultyID references an existing Faculty record.
