
Question 2. Circle T (true) or F (false) whether the ERD above supports each statement. **(12 points)**

a) T F Every guest must have at least one reservation.

b) T F A guest may make more than one reservation.

c) T F A reservation must belong to exactly one guest.

d) T F A reservation may include more than one room.

e) T F A room may have no reservations.

f) T F Each room can be associated with only one reservation.

g) T F A guest may have more than one phone number.

h) T F Every guest must have at least one phone number.

i) T F The PhoneNumber attribute alone is the primary key of the Phone table.

j) T F RoomNo in the Reservation table is both part of a primary key and a foreign key.

k) T F A guest may reserve the same room multiple times, provided the check-in dates are different.
