Attempt Score Pending Evaluation

Question 1 0 / 1 point

GROUP BY

Show each student major and the number of students in that major. Use NumberOfStudents as the column alias for the count. Do not include students who do not have a major.

```
SELECT Major, COUNT(*) AS NumberOfStudents
FROM Student
WHERE Major IS NOT NULL
GROUP BY Major;
```

This question has not been graded.

The correct answer is not displayed for Written Response type questions.

Question 2 0 / 1 point

GROUP BY with Aggregate Functions

Show each department from the Course table, the total number of credit hours offered by that department, and the average number of credit hours per course.

```
SELECT Department, SUM(Credits), AVG(Credits)
FROM Course
GROUP BY Department;
```

This question has not been graded.

The correct answer is not displayed for Written Response type questions.

Question 3 0 / 1 point

GROUP BY and HAVING

Show the majors that have at least three students. Display the major and the number of students in that major.

```
SELECT Major, COUNT(*)
FROM Student
GROUP BY Major
HAVING COUNT(*) >= 3;
```

This question has not been graded.

The correct answer is not displayed for Written Response type questions.

Question 4 0 / 1 point

WHERE, GROUP BY, HAVING, and ORDER BY

Show each course ID and the number of students enrolled in that course for the Fall 2026 semester.

Display only courses with at least two students enrolled, and sort the results from the highest enrollment to the lowest.

```
SELECT CourseID, COUNT(*)
FROM Enrollment
WHERE Semester = 'Fall 2026'
GROUP BY CourseID
HAVING COUNT(*) >= 2
ORDER BY COUNT(*) DESC;
```

This question has not been graded.

The correct answer is not displayed for Written Response type questions.

Question 5 0 / 1 point

JOIN

Show the student ID, student name, course ID, course name, and semester for every student enrollment.

```
SELECT Student.ID, Student.Name, Course.ID, Course.Name, Enrollment.Semester
FROM Student
JOIN Enrollment
ON Student.ID = Enrollment.StudentID
JOIN Course
ON Enrollment.CourseID = Course.ID;
```

This question has not been graded.

The correct answer is not displayed for Written Response type questions.

Question 6 0 / 1 point

LEFT JOIN

Show the course ID and course name for all courses, that have no enrollments.

```
SELECT Enrollment.StudentID, Course.ID, Course.Name
FROM Course
LEFT JOIN Enrollment
ON Course.ID = Enrollment.CourseID
WHERE Enrollment.StudentID IS NULL;
```

This question has not been graded.

The correct answer is not displayed for Written Response type questions.

Question 7 0 / 1 point

Joining More Than Two Tables

Show the student name, course name, faculty name, and semester for each enrollment.

```
SELECT Student.Name, Course.Name AS CourseName, Faculty.Name AS FacultyName,
Enrollment.Semester
FROM Student
JOIN Enrollment
ON Student.ID = Enrollment.StudentID
JOIN Course
ON Enrollment.CourseID = Course.ID
JOIN Faculty
ON Course.FacultyID = Faculty.ID;
```

This question has not been graded.

The correct answer is not displayed for Written Response type questions.

Question 8

0 / 1 point

Subquery

Show the student ID, name, major, and GPA for all students whose GPA is higher than the average GPA of all students.

```
SELECT ID, Name, Major, GPA
FROM Student
WHERE GPA >
(SELECT AVG(GPA)
FROM Student
);
```

This question has not been graded.

The correct answer is not displayed for Written Response type questions.

Question 9

0 / 1 point

Derived Table

Using a derived table named CourseCounts, determine the maximum number of students enrolled in any course. Use NumberOfStudents as the alias for the enrollment count.

```
SELECT MAX(NumberOfStudents)
FROM (
SELECT CourseID, COUNT(*) AS NumberOfStudents
FROM Enrollment
GROUP BY CourseID
) AS CourseCounts
```

This question has not been graded.

The correct answer is not displayed for Written Response type questions.

Question 10

0 / 1 point

Common Table Expression (CTE)

Using a CTE named CourseCounts, show the course ID, course name, and number of students enrolled for the course(s) with the highest enrollment. Your query should return all courses in case of a tie.

```
WITH CourseCounts AS (
SELECT CourseID,
COUNT(*) AS NumberOfStudents
FROM Enrollment
GROUP BY CourseID
)
SELECT Course.ID,
Course.Name,
CourseCounts.NumberOfStudents
FROM Course
JOIN CourseCounts
ON Course.ID = CourseCounts.CourseID
WHERE NumberOfStudents = (
SELECT MAX(NumberOfStudents)
FROM CourseCounts
);
```

This question has not been graded.

The correct answer is not displayed for Written Response type questions.
