

Business Constraints:

- The max number of tables is 20
- The max occupancy of each table is 6
- Wait staff capacity
 - Novice: maximum 3 tables
 - Experienced: maximum 5 tables
 - Very Experienced: maximum 7 tables
- Only Very Experienced can serve Priority tables

EXERCISE:

- The restaurant has exactly 20 physical dining tables
- Each table seats up to 6 customers
- Each table has a status: either "priority" or "non-priority"
- Customers can make reservations for any day of the year
- One customer can reserve multiple tables (up to 20) for the same day
- The restaurant has only one seating time per evening, so you only need to track the date (not specific times)
- All employees are wait staff who serve tables
- Employees have experience levels: Novice, Experienced, or Very Experienced
- Table assignment limits based on experience:
 - o Novice: maximum 3 tables per day
 - o Experienced: maximum 5 tables per day
 - o Very Experienced: maximum 7 tables per day
- Only Very Experienced employees can work priority tables
- Table assignments can change daily for each employee
- Every table must be assigned to an employee each day
- At least one Very Experienced employee must work each day
